Professional Summary

Full Stack Developer with hands-on experience in Python, Django, and Flask-based web applications. Built projects involving REST APIs, database management, and basic machine learning for resume screening. Strong focus on backend development, scalable web applications, and problem-solving.

Education

R.V.R. & J.C. College of Engineering, Guntur	2024 – 2027
B.Tech in Artificial Intelligence and Machine Learning	CGPA: 8.67
GIET Polytechnic College, Rajahmundry	2021 – 2024
Diploma in Computer Engineering	89%
S.M.S.S High School, Kovvur	2020 – 2021
SSC	100%

Internship

Python Full Stack Intern – Anurag IT Solutions (Onsite)	Oct 2023 – Apr 2024
--	---------------------

Training and Internship Program

- Worked on full-stack development using Python, Django, HTML, CSS, JavaScript, Bootstrap, and MySQL.
- Developed responsive UI components using Bootstrap 5 and jQuery.
- Built a Student Information Management System using Python, Tkinter, and SQLite with full CRUD operations.
- Handled and tested 100+ student records to improve data management workflow.
- Gained experience in backend integration and database-driven application design.

Projects

E-commerce Web Application	GitHub
-----------------------------------	--------

Django, SQLite, HTML, CSS, Bootstrap

- Built a full-stack e-commerce web application using Django with user authentication and product management.
- Implemented shopping cart, order processing, and database operations using Django ORM and SQLite.
- Designed responsive frontend using Bootstrap 5 for mobile and desktop compatibility.
- Developed dynamic product listing and category-based filtering system.

AI Resume Screening System	GitHub
-----------------------------------	--------

Python, Flask, Scikit-learn, NLP, SQLite

- Built an AI-based resume screening system to match resumes with job descriptions using NLP techniques.
- Implemented PDF text extraction and TF-IDF vectorization for feature representation.
- Used cosine similarity to compute match scores between resumes and job descriptions.
- Identified matched and missing skills to assist automated candidate screening.

Weather App using Django	Live
---------------------------------	------

Django, Bootstrap, OpenWeatherMap API

- Built a Django-based weather application to fetch real-time weather data using OpenWeatherMap API.
- Displayed temperature, humidity, and wind speed with a responsive UI.

Certifications

- Data Structures and Algorithms using Java – NPTEL, IIT Kharagpur (Top 5%, 70%, 2025)
- Django Web Development with 5 Real Projects – Udemy (2025)
- Python Django 101 – Simplilearn (2025)
- HTML Tutorial Module – Scaler Topics (2024)
- Web Development with HTML and CSS for Beginners – Alison (2024)

Technical Skills

Languages: Python, Java (Basic), JavaScript (Basic)

Frameworks: Django, Flask (Learning), Tkinter

Web Technologies: HTML, CSS, Bootstrap, jQuery

Databases: MySQL, SQLite

Tools: Git (Basic), GitHub, VS Code

Concepts: OOP, REST API Basics, Problem Solving, CRUD Operations

Achievements

- Selected as a finalist in Smart Idea Challenge 2024 conducted by RJ E-Nest and ED Cell at R.V.R. & J.C. College of Engineering.
- Participated in *Rupajna 2025* intra-college prototype challenge organized by RJ E-Nest and ED Cell.
- Participated in Code Crack Conquest – Data Structures Concepts conducted by Tech Club, R.V.R. & J.C. College.
